## Commercial protected premises control unit

This fire alarm control panel complies with NFPA 72. Installation in accordance with technical reference manual P/N 3100353 is mandatory.

**Model (check one):**

- ☐ FS302(G)(GD)(R)(RD) 120 V, 60 Hz, 0.8 A ☐ FS302(G)(R)-2 230 V, 50/60 Hz, 0.4 A
- ☑ FS502(G)(GD)(R)(RD) 120 V, 60 Hz, 0.8 A ☐ FS502(G)(R)-2 230 V, 50/60 Hz, 0.4 A
- ☐ FS1004(G)(GD)(R)(RD) 120 V, 60 Hz, 1.6 A ☐ FS1004(G)(R)-2 230 V, 50/60 Hz, 0.8 A

**Fire alarm systems supported:** Local (requires at least one alarm input circuit and one audible output circuit), Remote Station - Protected Premises Unit (same as Local plus DACT, CTM4.7, or RPM), Auxiliary (same as Local plus CTM4.7), Central Station (with DACT)

**Type of service:** Automatic and manual fire alarm, waterflow alarm, sprinkler supervisory, and digital alarm communicator

**Types of signaling:** Noncoded, coded

**FCC compliance:** This device complies with Part 15 of the FCC Rules. Operation is subject to the following conditions:

1. This device may not cause harmful interference.
2. This device must accept any interference received including interference that may cause undesired operation.

**WARNING:** The IDC circuits shown with a check mark use an alarm verification feature that delays system alarm signals for not more than 30 seconds. No other smoke detectors may be connected to these circuits unless approved by the local authority having jurisdiction.

Refer to FireShield ULI and ULC compatibility lists, p/n 3100468, for restrictions.

Smoke detector compatibility identifier: 100

| IDC | Zone | Alarm verify |
|---|---|---|
| 1 | | ☐ |
| 2 | | ☐ |
| 3 | | ☐ |
| 4 | | ☐ |
| 5 | | ☐ |
| 6 | | ☐ |
| 7 | | ☐ |
| 8 | | ☐ |
| 9 | | ☐ |
| 10 | | ☐ |

**WARNING:** High voltages may be present. Disconnect all sources of power then wait approximately 30 seconds before servicing. The waiting period allows capacitors enough time to discharge to a safe energy level.

**CAUTION:** This product contains static sensitive components and requires special handling precautions.

**Programming instructions**

1. Place the jumper across PRG.
2. Press **Remote Disconnect** to select an option.
3. If you are programming an IDC or NAC circuit, press **Disable** to select the corresponding circuit.
4. Press **Reset** or **Signal Silence & Drill** to select a setting.
5. Press **Panel Silence** to save your selection.
6. Press **Remote Disconnect** to advance to the next option or **Walk Test** to go to the previous option.
7. Remove the jumper from PRG.

**LED BINARY VALUES**

**Note:** If no action is taken in program mode for 90 seconds, the trouble buzzer sounds and the top row of LEDs flash. Pressing Remote Disconnect returns the panel to the current option.

FSDACT complies with 47CFR Part 68
Allowable jack types: RJ31X, CA31X
**FCC CERT NO:** US: EDWAL01BFSDACT
**RING EQ. NO/LOAD NO:** 0.1B
**IND. CANADA NO:** IC: 3944A-FSDACT

P/N 3100352 REV: 3.0
